Experience

Cofounder at Ekikya

Ekikya is a project started by high-school students that aim to uplift the status of single mothers in Nepali society by bringing stories of single mothers from every nook and cranny to the mainstream. We strongly believe in the impact storytelling has. We collect anonymous stories from single mothers and share them on our social media platforms with the aim to create safe and comfortable societies where single mothers can thrive judgment-free. As the cinematographer and video editor, I produce different varieties of videos ranging from reaction videos to documentaries and promos. Recently, we won the national round of Generation Youth Challenge organized by Impact Hub Kathmandu, UNDP Nepal, UNICEF Nepal, and ILO Nepal and are preparing for the international rounds.

Executive Marketing Manager at Seedlings Nepal

Seedlings Nepal was established with the goal of arranging numerous events and programs for youngsters to strengthen themselves in their areas of expertise, such as business, social studies, psychology, sociology, anthropology, and applied science. Along with that, we also aspire to embed soft skills in the youths through public speaking, leadership opportunities, design thinking, and collaborative activities which foster confidence, curiosity, and adaptability. We strive to fill the void that might lead to missing out on chances at the national and international levels. As an executive team head, I have been bringing forward ideas for various skill workshops and leading

a team of 4 to handle social media sites, content creation, and manage the website. I specially create video content for proper youth engagement.

District Representative and Video Content Creator at AuraED

AuraED helps students from underprivileged areas to learn about computers and their uses. As children living in poverty are facing many barriers to accessing education, we ensure all children receive primary and basic education about computers. Our mission is to reach every school and community, especially the most disadvantaged to improve their access and make them participate in our program. I create various video learning materials for the students to engage and understand properly. As a district representative, I have searched and contacted organizations to work with and led a team of tutors including myself to orphanages and local schools in my district, and taught the basics of computers and the internet.

Freelance Filmmaker

Along with the other activities, I have a great interest in cinematography and video editing. I have been creating some short films and videos showing the social problems and scenarios of Nepal. I won a Short Video Competition organized by the Association of Youth Organization Nepal and UNDP. I want to create an impact via my short films in society to aware people of the problems prevailing in our society.

SKILLS

Leadership, Video Editing, Organization, Cinematography
